

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

In Re Application of:

Su Lin Oon et al.

Serial No.: 10/817,359

Filed: 04/02/2004

Confirmation No.: 2554

Group Art Unit: 2814

Examiner: Louie, Wai Sing

Docket No. 70040110-1

For: **USING MULTIPLE TYPES OF PHOSPHORS IN COMBINATION WITH A  
LIGHT EMITTING DEVICE**

**INTERVIEW SUMMARY**

Applicants thank Examiner Wai-Sing Louie for the telephone conversation between Examiner and Applicants' representative P. S. Dara on January 23, 2008. During this conversation, Applicants' representative reminded Examiner of an earlier conversation on August 13, 2007 wherein Examiner was alerted to the fact that the final rejection dated 07/23/2007 was defective in that the rejection did not accurately address the pending claims. Specifically, the rejection fails to address a portion of claims 1 and 14 which cite  $\text{Sr}(\text{Ba,Ca})\text{SiO}_4\text{:Eu}$ ; and claim 21 which cites a first type of phosphor that emits green light. During the earlier conversation, Examiner had agreed to vacate the pending rejection and issue a fresh rejection. However, this action was not carried out as of January 23, 2008, thereby leading to the telephone call by Applicants' representative to Examiner on January 23, 2008. Examiner has since offered to withdraw the rejection and re-set the date by issuing a new rejection.

Applicants desire to place this interview and agreement on record and request suitable action by Examiner to facilitate moving forward prosecution in the case. Applicants once again thank Examiner for his cooperation. If, in the opinion of the Examiner, a telephonic conference would expedite matters, the Examiner is invited to call the undersigned representative at (404) 610-5689.

I hereby certify that this paper is being electronically transmitted to the Commissioner for Patents on the date shown below:
